## ABOUT ME

I am a Frontend Developer passionate about building visually appealing and functional web applications. At present, I work as a freelancer, helping my clients turn their ideas into working applications. I helped my last client develop an internal tool related to the AI sector.

Due to my education and current position, I have a strong command of English, both in writing and speaking. I am a team player with highly developed communication skills, yet I can also work effectively independently. I am hardworking, not afraid of new challenges, and I look forward to the opportunity to demonstrate my skills during an interview.

## SKILLS

- HTML
- CSS/SASS
- JavaScript
- React.js
- TypeScript
- Tailwind/Bootstrap
- Next.js
- Jest + RTL
- REST/GraphQL API
- Redux/Zustand
- ShadCN

## TOOLS

- Git
- Jira
- VS Code
- NPM/PNPM
- Webpack
- Node.js
- Vite
- Figma
- Firebase
- SanityCMS
- Vercel

## EXPERIENCE

### Frontend Developer (Freelance)

Self-Employed, 02.2025 - Present

- collaborating with clients and, if applicable, their IT teams to ensure the successful development of applications
- ensuring best practices and high code quality for implemented solutions
- creating detailed documentation for implemented solutions
- participating in daily team meetings to review progress and address challenges

#### Tech Stack:

• **HTML • CSS • SCSS • JS • React • Next.js • Redux • TypeScript • Tailwind • Node.js**

### Frontend Developer

Publicis Groupe/ PXP, 11.2023 - 12.2024

- designing and developing solutions for specialists in the medical industry
- developing and maintaining automation tools to improve workflow efficiency
- preparing detailed and accurate documentation for software solutions
- actively collaborating in team efforts, including pair programming sessions
- participating in daily team meetings to discuss progress and roadblocks

#### Tech Stack:

• **HTML • CSS • SCSS • JS • React • Next.js • TypeScript • Node.js • Tailwind • ShadCN**

### Web Publisher

Cheil Germany GmbH Sp. z o.o., 04.2021 - 03.2024

- administration of websites (including product pages and campaign pages)
- building pages from scratch based on prepared briefs
- publishing and modifying content on websites using CMS, as well as HTML, CSS, and JS
- checking website content and functionality
- direct contact with clients

#### Tech Stack:

• **HTML • CSS • JS • Jira • AEM**

### Financial Advisor and Manager

Various Financial Institutions, 06.2012 - 03.2021

Over 9 years, I worked in various financial institutions, supporting entrepreneurs in acquiring financing for their businesses. During this time, I developed key skills that I now apply in my tech career:

- strong communication and interpersonal skills
- team collaboration and coordination
- effective time management and self-discipline

I hereby give consent for my personal data included in the application to be processed for the purposes of the recruitment process in accordance with Art. 6 paragraph 1 letter a of the Regulation of the European Parliament and of the Council (EU) 2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

## LANGUAGES

- Polish - native
- English - advanced

## INTERESTS

- Books
- New Techs
- Travels
- Horror Films

## PERSONAL PROJECTS

### Healthy Skin Clinic (Klinika Zdrowej Skóry)

A fully functional website built for a small business in the wellness industry. The project leverages a modern frontend stack and integrates with a headless CMS (Sanity) to enable dynamic content updates. Selected routes are statically generated, while others are rendered on the fly based on live CMS data. The site is optimized for performance and SEO, and will be further developed to include features such as service pricing pages, course enrollment, and integrated payment functionality.

#### Tech Stack:

• **Next.js** • **React** • **TypeScript** • **Tailwind CSS** • **ShadCN UI** • **React Final Form** • **ScrollReveal** • **Sanity (headless CMS)** • **Vercel** • **CI/CD pipeline**

- code: [github.com/noszczykmichal/nextjs-klinika-zdrowej-skory](https://github.com/noszczykmichal/nextjs-klinika-zdrowej-skory)

### Minimalistic Storefront

As the name suggests, this is a mock-up page of an imaginary online shop that fetches data from a GraphQL endpoint. The project consists of three types of pages: the PLP (category page), the PDP (product page), and the Cart pages. Originally, the project was built with class-based components, as per the project requirements. Subsequently, I migrated it to TypeScript to enhance the code quality and introduced additional cart pages to provide a more realistic simulation of the product ordering process. The latest changes include adding a testing layer to this project.

#### Tech Stack:

• **React** • **TypeScript** • **Redux** • **Redux Persist** • **React Router** • **GraphQL API** • **Jest** • **RTL** • **ESLint (Airbnb config)** • **Prettier** • **Webpack**.

- code: [github.com/noszczykmichal/minimalistic-storefront](https://github.com/noszczykmichal/minimalistic-storefront)

### Book4u

This project utilizes a REST API built on the basis of Project Gutenberg's catalog and allows users to browse and read books available through Project Gutenberg. Upon launch, the app downloads a set of books that are the most popular. Users can also use filters to narrow down criteria and search for books according to their liking, such as books by a specific author.

#### Tech Stack:

• **React** • **TypeScript** • **React Router** • **React Hooks** • **React Context** • **React Transition Group** • **ESLint (Airbnb config)** • **Prettier** • **Vite** .
