ABOUT ME

I'm a Frontend Developer who is passionate about building nice-looking and functional web apps. Currently, I'm helping to develop solutions for the medical industry that are used every day by thousands of specialists all over the world. Due to my education and presently held position I have a good command of English both in writing and in speech. I am a team player with highly developed communication skills but as well I can work effectively on my own. I am hard working and not afraid of new challenges and I am looking forward to having a chance to demonstrate my skills during interview.

SKILLS

- HTML
- CSS
- JavaScript
- React.js
- TypeScript
- SCSS
- Tailwind

TOOLS

- Git
- VS Code
- Jira
- Slack
- G-Suite
- Figma

LANGUAGES

- Polish - native
- English - advanced

EXPIERENCE

Frontend Developer

Publicis Groupe/ PXP, 11.2023-Current

- designing and developing solutions for specialists in the medical industry
- developing and maintaining automation tools to improve workflow efficiency
- preparing detailed and accurate documentation for software solutions
- actively collaborating in team efforts, including pair programming sessions
- participating in daily team meetings to discuss progress and roadblocks

Web Publisher

Cheil Germany GmbH Sp. z o.o., 04.2021-03.2024

- administration of websites (including product pages and campaign pages)
- building pages from scratch based on prepared briefs
- publishing and modifying content on websites using CMS, as well as HTML, CSS, and JS
- checking website content and functionality
- direct contact with clients

Financial Advisor and Manager

Various Financial Institutions, 06.2012 - 03.2021

For 9 years I worked in various financial institutions, helping entrepreneurs acquire financing for their businesses. Thanks to this experience I have:

- acquired communication skills
- learnt how to work as a part of the team
- learnt how to manage my time to work effectively on my own

PROJECTS

Minimalistic-storefront

As the name suggests, this is a mock-up page of an imaginary online shop that fetches data from a GraphQL endpoint. The project consists of three types of pages: the PLP (category page), the PDP (product page), and the Cart pages. Originally, the project was built with class-based components, as per project requirements. Subsequently, I migrated it to TypeScript to enhance the code quality and introduced additional cart pages to provide a more realistic simulation of the product ordering process. Most recently, I have started implementing a testing layer for this project. The main dependencies include React, TS, Redux, Redux Persist, React Router, ApolloClient and Jest. Code quality is enforced using ESLint (Airbnb config) and Prettier.

- code: github.com/noszczykmichal/book4u

I hereby give consent for my personal data included in the application to be processed for the purposes of the recruitment process in accordance with Art. 6 paragraph 1 letter a of the Regulation of the European Parliament and of the Council (EU) 2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

INTERESTS

- Books
- New Techs
- Travels
- Horror Films

Personal website - v2

Even though this project may not initially seem like something to boast about on my resume, it provided me with the perfect opportunity to put into practice the skills I have learnt. My objective was to create a minimalistic yet appealing personal website that I can use without feeling embarrassed for years to come. In the case of this project, I had the opportunity to practice using React along with Sass. As with all my other projects, code quality is enforced using ESLint with the Airbnb configuration and Prettier.

Book4u

This project utilizes the REST API built on the basis of Project Gutenberg's catalog and allows users to browse and read books available through Project Gutenberg. Upon launch, the app downloads a set of books that are the most popular. Users can also use filters to narrow down criteria and search for books according to their liking, such as books by a specific author. For this app, I am using React.js, as well as ReactRouter, React Hooks, React Context, and React Transition Group. The quality of the code is enforced with ESLint (Airbnb config) and Prettier.

EDUCATION

Maria Curie-Skłodowska University • Lublin

Bachelor of Science in Economics, 2009-2012

Maria Curie-Skłodowska University • Lublin

Master of Arts in English Literature, 2008-2011

Nauczycielskie Kolegium Języków Obcych • Lublin

Bachelor of Arts in English Literature, 2005-2008

COURSES

Academind GmbH • Understanding TypeScript

A 15 hours long course on Typescript and its usage in the modern web development.

Academind GmbH • CSS - The Complete Guide 2022 (incl. Flexbox, Grid & Sass)

Over 20 hours long course on CSS. Thanks to this course, I have broadened my knowledge on features like Grid, Flexbox and Sass.

Academind GmbH • React - The Complete Guide (incl Hooks, React Router, Redux)

Over 40 hours long course on React.js. Thanks to this course I have learnt the newest trends in development of the modern web applications.

Akademia 108 • Programming school

A 2 months long course on the modern web development thanks to which I have learnt basics of such technologies and tools as: GIT, HTML5, CSS3, JavaScript, jQuery, SASS, GULP, Bootstrap, React.

I hereby give consent for my personal data included in the application to be processed for the purposes of the recruitment process in accordance with Art. 6 paragraph 1 letter a of the Regulation of the European Parliament and of the Council (EU) 2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
